

CAT Adjusters

Client Type:
Global Loss Adjusting Firm

Duration:
2 Months

Project Scope:
Commercial and Personal Property Claims

Team Size:
145 CAT Adjusters

Problem

When **multiple natural disasters occurred simultaneously in the United States**, a global loss adjusting firm needed help handling a **severe influx of property and casualty claims**. Due to the severity of the events, the client needed CAT adjusters to provide support in multiple states.

Solution

We were able to quickly get our adjusters on-site for training. Once they were up to speed, they began handling the influx of claims. Our adjusters quickly processed claims and **within two months, our professionals helped the client's staff catch up**. Additionally, **Jacobson coordinated the emergency state licensing process**, which involved overseeing the adjuster applications, confirming licenses and providing them to the client.

Response

Jacobson **built a temporary claims department in two weeks**. We sourced and screened more than 300 adjusters with commercial and personal property claims experience, ultimately **placing and onboarding 145 CAT adjusters**.
