

Product Contract Analysts

Client Type:

Life Insurance Organization

Project Scope:

Contract Drafting

Duration:

6 Months

Team Size:

6 Full-Time Analysts

Problem

Our client, a Fortune Global 500 and Fortune 500 company, was faced with a timely project to **update the language of a large amount of old and outdated coverage certificates**. Due to competing priority projects, their full-time staff was not able to complete the work in the time frame allotted.

Solution

With the help of our team, the client was able to draft and complete the new certificate documents for all of the impacted cases in the six month time frame. This project **provided risk mitigation and up-to-date documentation** for the organization.

Response

Jacobson provided a team of analysts with **expertise in working with contracts and certificates** to meet our client's needs. They specifically required consultants with the ability to **update and draft group certificates** to meet the company's current standards.
