

Data Analyst

Client Type:
Health Plan

Project Scope:
Complex Data Analysis

Duration:
5 Months

Team Size:
1 Full-Time Consultant

Problem

This health insurance company was in need of support in order to handle a backlog of financial, population and claims data. The organization required an expert with a health insurance background along with SQL and Excel experience.

Solution

The consultant completed more than a dozen analyses, providing a wide range of information. This included business critical trends that impacted this health plan's future revenue and expenditures. Very satisfied with the work completed, the client offered this professional a position as a full-time employee.

Response

Jacobson was able to provide a qualified medical claims analysis expert to support this need. The analyst had nearly a decade of experience working for health plans, and specialized in extracting and analyzing large data sets.
